 products for computer
 based equipment

Micromodules MSXXI2
 Solid State 2.5-inch Flash Drive,

Solid State Hard Drive with IDE Interface

- Replaces regular IDE 2.5-inch hard drives
- Drop-in replacement for laptops, all applications
- 44-pin IDE data/control connector
- Uses 5V only, same as rotating media
- Uses non-volatile flash memory
- Will boot all Operating Systems
- Faster operation and boot-up
- Storage management moves frequently accessed areas to optimize flash life
- Memory sizes from 8Gb to 512Gb
- All capacities available after Jan. 1st, 2016

Micromodules Co. has been supplying accessory modules for industrial, commercial and embedded computers since 1989. In our efforts to provide products to keep older equipment running, we have discovered that users of PCs that were built using IDE hard disk drives have no source for replacement drives, as none of the hard drive manufacturers have made them for several years. We have created a flash memory-based IDE drive replacement, using industry standard components, plus a custom IC device to recreate the IDE interface.

From these devices, you can expect:

- Self diagnostic testing
- Usable life 10 years
- Auto block move counts number of times block is reprogrammed and moves the data to maximize life
- Warranty-1 year
- Faster boot-up time than a regular hard disk drive
- Extended temperature range 0-70 degrees centigrade

Price and availability:

Part No.	MS08I2	MS16I2	MS32I2	MS64I2	MS128I2	MS256I2	MS512I2
Capacity	8 Gb	16GB	32GB	64GB	128GB	256GB	512GB
Price	\$ 49.99	\$ 54.99	\$ 69.99	\$ 84.99	\$ 119.99	\$ 219.99	\$ 329.99
Available	1 Week	1 Week	2 Weeks	3 Weeks	2 Weeks	2 Weeks	2 Weeks
